Nicolas,

Thanks for the update. Katie is actually back at ADEQ in the same position. Her email is [pactrickk@adeq.state.ar.us](mailto:pactrickk@adeq.state.ar.us) and her phone number is 501-682-0872. Let me know if you need anything else.

Terry

Hello Terry, we completed our initial assessment and I will be requesting an ATSDR consult in the next month. Once I get the consult, I plan to start scheduling the removal action for the Spring. Our enforcement officer asked me if we could contact Katie. Did she leave a forwarding contact number? We are trying to find out what electric companies contributed to the PCBs from the transformers. She had mentioned in the report that oil was drained on site during the operation. Any help you could give us would be appreciated.

Terry, we arrived on site today and have started collecting samples. We should be finished by Friday.

Sorry for the late notice, I came straight from the LA Flood Response. I will be on site through Friday at 1100am.

Thanks Nicolas,

I didn't think you would be able to do anything this week.

Terry, we have to reschedule our sampling at Hope Iron and Metal due to the rain event. The ground is too saturated to do locates, so we will try in a couple of weeks. I will let you know once we have it rescheduled.

That's correct, let me know what days you plan on being at the site and we will try and come down.

Thanks for the update.

Hello Terry, I spoke with Katie last week and she informed me that you are now the primary contact for the Hope site. Is that correct?

I wanted to inform you, that we obtained access from the current owner of the property, and we will be planning a sampling event during the week of Aug 15-19<sup>th</sup>. I just wanted to make sure that you all are aware of our assessment progress.

Let me know if you have any questions.
